To whom it may concern,

I had the opportunity to work with Federico at 28msec for many years. We worked very closely on several IT projects for key clients.

Federico is one of the most reliable and hard working persons I have ever met. Additionally, I was constantly amazed by his deep knowledge about database technology, system architectures and software engineering, but also about his incredibly likeable personality.

He has the ability to master new fields of technical problems in record time and I'm convinced that he is capable to solve every software or system related problem faster and better than 99.9% of all engineers. I enjoyed working with Federico a lot and really hope to be able to work with Federico again in the future.

Yours faithfully,
